

Five Themes of Geography

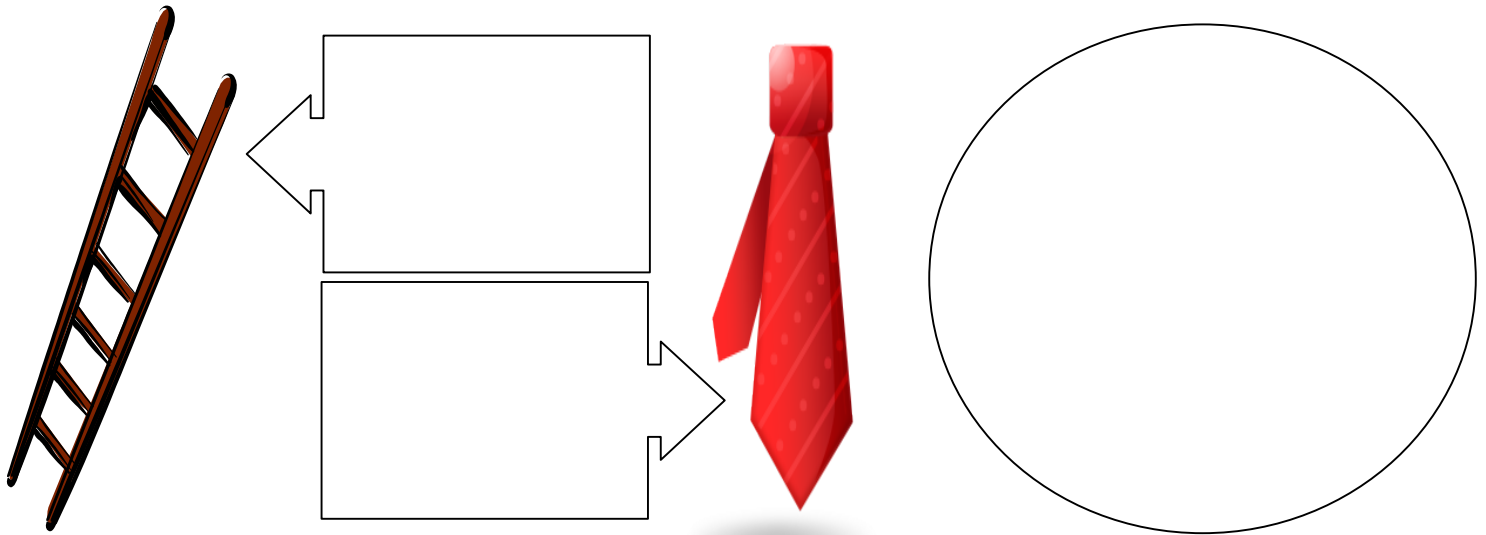

Name: _____

1. **Location:** Where are things located? A location can be absolute (for example, latitude and longitude or a street address) or relative (for example, explained by identifying landmarks, direction, or distance between places).

Example 1:

Example 2:

2. **Place:** Characteristics that define a place and explains what makes it different from other places. These differences can take many forms including physical or cultural differences.

Example 1:

Example 2:

3. **Human Environment Interaction:** This theme explains how humans and the environment interact with each other. Humans adapt and change the environment while depending upon it.

Example 1:

Example 2:

Positive of HEI →

Neg of HEI →

4. **Region:** Geographers divide the earth into regions making it easier to study. Regions are defined in many ways including area, vegetation, political divisions, etc.

Example 1:

Example 2:

5. **Movement:** People, items, and ideas (mass communication) move and help shape the world

Example 1:
